

Morawa Town Hall - Kitchen Project

Update # 1 – 21 November 2018

The long awaited Morawa Town Hall Kitchen Project is due to commence in early December using designs from the project plans previously drafted in consultation with community. This project will deliver a brand new kitchen fit out for our beautiful Town Hall.

The rear window will be bricked up next week to allow for the relocation of the existing stoves and range hoods. The existing kitchen flooring will be removed and replaced with commercial R12 Vinyl flooring. The servery roller doors will also be replaced. Stainless steel benches will be installed to ensure our new kitchen will be in line with food preparation requirements. The existing laminate servery benches will be upgraded and will also contain storage cupboard space for some crockery, cutlery, and glassware. Appliances such as the cooktops, ovens and fridges will be replaced. A new commercial dishwasher will be installed as will be new lighting. Plumbing and electrical works will be undertaken to accommodate our changes.

Please note that the Town Hall Kitchen Facility and Lesser Hall will be unavailable for hire until these works are completed. The Main Hall will be available to be used on the basis that you do not require the kitchen or lesser hall facility. If hiring the main hall during this period please discuss with us first as there may be some noise that may impact on your event.

The Shire of Morawa will keep you up to date on the works as they progress. So please keep an eye on our Facebook Page and our website Project page.
